

INSTANT

PRESS RELEASE

June 2026

Free Percussion Instrument for Electronic Music Producers

Open It. It's Already Playing.

You do the same thing in every session. Find a sample. Load it into a drum machine or sampler. Program the same clap pattern you've built a hundred times. Hihats. Add shuffle. Fiddle with velocity. Instant eliminates that entirely.

Open the plugin and a pattern is already running. Pick clap, snare, closed or open hihat, choose from the factory library or drop in your own favorite samples, and you're done. One plugin, one channel, all the basic controls. Never been quicker to add percussion to a track.

For producers who want to go deeper, Instant doesn't hold back. A 32-step sequencer is right there with per-step velocity randomization, micro-timing nudge, shuffle and swing, Elektron-style parameter locks on every control, and instant drag-to-DAW audio export. All of it optional: the pattern runs without touching any of it.

KEY FEATURES

Sequencer	32-step sequencer, variable pattern length, per-step velocity, shuffle/swing, micro-timing nudge per step, fill toggle, velocity randomizer
Parameter Locks	Per-step locks for pitch, HP filter, LP filter, shape envelope, shuffle, reverse, and micro-timing — Elektron-style, saved with presets
Sampler Engine	4 instrument slots (Clap, Snare, Closed HH, Open HH), factory samples included, load your own WAV/AIFF by folder — auto-categorized
Sound Shaping	Pitch control +/-24 semitones, 24 dB/oct HP and LP filter, shape envelope, reverse playback, master output level
Export	Drag audio directly to DAW timeline — renders frame-perfect at project tempo with all locks, filters, and shuffle baked in
General	Resizable UI, preset save/load, free

AVAILABILITY

Format	VST3, AU
Platform	macOS (Apple Silicon Native, Intel), Windows 10 64-bit or later
Price	Free
Download	terminalvst.com

ABOUT

Instant is developed by Patrik Skoog, a mixing and mastering engineer with credits on Drumcode, Cocoon, Synewave, Ovum, and Planet Rhythm. Instant is released alongside Terminal, a distortion feedback engine plugin for electronic music producers.
